IT 112 Professor

How to Clone & Open the Project

1. Install Git - Make sure Git is installed on your computer.

- To check if it's already installed, open terminal / command prompt and run:

- If not installed, download it from: <https://git-scm.com/> and follow the installation steps.

2. Copy the Repository Link

1. Go to the project's GitHub page.

2. Click the green Code button (near the top-right).

Select HTTPS and copy the link (example: <https://github.com/your-username/yourrepo-name.git>).

3. Open VS Code

1. Launch Visual Studio Code.

2. Go to File → Open Folder... and choose or create a folder where you want to save the project.

4. Clone the Repository

1. Inside VS Code, open the integrated terminal: - Or go to Terminal → New Terminal

2. Paste this command (replace the link with the one you copied earlier):

3. Press Enter — this will download the full project into your selected folder.

5. Open the Project

1. In VS Code, go to File → Open Folder...

2. Select the newly created folder (named same as your repository).

3. Done — you can now view, edit, and run the full project files.
